

IIC 3.0 MUJ — INTERNATIONAL INNOVATION CHALLENGE

THEME: EDTECH • PS-08

TEAM: OUTLIERS

ProofBridge

Evidence-Based Talent Intelligence Platform for Academia & Industry

CORE THESIS

Transforming campus placements from resume-based guessing into **cryptographic, evidence-backed skill verification** and automated curriculum intelligence.

• LIVE ON LOCALHOST:3000

PROBLEM STATEMENT

The Crisis of Resume Inflation & Curriculum

THE CORE
PARADOX

Students claim skills they don't have. Recruiters spend **42 hours** per hire, manually parsing unverified resumes, what industry needs **until companies stop coming**.

01 - FOR STUDENTS

The Rejection Blackbox

- 78%** of student resumes carry exaggerated or generic claims — "React: Advanced", "Python: Expert".
- 0** actionable feedback on rejection. Students never learn **which specific concept** disqualified them.
- ∅** Unverified MOOC certificates carry zero signal for an engineering manager.

02 - FOR RECRUITERS

Screening Paralysis

- 42h** of engineering time burned per hire, manually parsing unverified resumes.
- 86%** rise in AI-generated, keyword-saturated CVs overwhelming ATS filters (LinkedIn, 2026).
- CGPA** and college prestige used as crutches — missing top-tier tier-1 builders entirely.

TRUST ARCHITECTURE

Solving the Four-Way Information Asymm

01STAGE

Evidence Capture
Student commits real code — GitHub AST, lab assignments, PRs, STL usage.

02STAGE

Faculty Audit
Standardized rubric evaluation of the project — 0% AI hallucination.

03STAGE

Credential Issued
Signed JSON-LD credential with Ed25519 signature & SHA-256 hash.

THE FOUR PRIMARY BENEFICIARIES

STUDENT

Evidence Passport
A portable credential that proves exact repository contributions — not adjectives.

PROOF, NOT CLAIMS

FACULTY

Standardized Rubrics
Grading tied directly to University Outcome-Based Education criteria.

HERO FEATURE 1

Evidence Over Claims: What Real Code Lo

CANDIDATE A — THE CLAIMED RESUME

“Advanced C++ & Backend Developer”

43%

PROOFBRIDGE AST VERIFIED SCORE

INSPECTION LOG

✗

Only 1 C++ repository found

✗

88% template / boilerplate code

✗

Zero STL containers or memory management

✗

No unit tests or CI pipelines

CANDIDATE B — THE CLAIMED RESUME

“Intermediate C++ & Backend Developer”

89%

PROOFBRIDGE AST VERIFIED SCORE

INSPECTION LOG

✓

4 C++ repositories found

✓

Extensive use of STL containers

✓

CLI system implemented

✓

Contributed to open source

Candidate B wrote “Intermediate”. Candidate A wrote “Advanced”. Resume

ARCHITECTURE & ENGINEERING

Enterprise-Grade, Deterministic, and Self

LAYER 01

Frontend & Experience

Next.js 14 App Router

TypeScript

Tailwind CSS

Lucide Icons

Framer Motion

CLIENT-SIDE VERIFICATION

Cryptographic signature checks run in-browser via [SubtleCrypto](#) — no server round-trip required.

LAYER 02

Data & Vector Intelligence Co

- ▶ PostgreSQL on Supabase with Row-Level Security (RLS)
- ▶ [pgvector](#) embedding store for role-to-skill similarity clustering
- ▶ Deterministic Role Coverage Algorithm — identical inputs always yield identical scores

ROLE COVERAGE FORMULA

$$\text{Score} = \sum (W_i \times \min(1, S_{i,rl} / R_{i,rl})) \times \text{Mandatory_Multiplier}$$

3-PHASE EXECUTION ROADMAP

PHASE 1 • DELIVERED

Hackathon Final Build

Native SaaS platform, GitHub AST parser, Role Genome matching, Dean's Curriculum Radar, live PostgreSQL backend.

PHASE 2 Q3 2026

Federation & Sandbox

Multi-university federation across the Manipal network, plus an automated WASM-based code execution sandbox.

PHASE 3 Q4 2026

National & ATS Integration

Direct integration with the registry and enterprise ATS Workday, Greenhouse.
