

01 · THE CRISIS IN RECRUITMENT

Resumes Are Broken. Keyword

Generative AI has flooded recruitment portals with fabricated, keyword-stuffed CVs. Degrees sign not production software competence.

THE TRADITIONAL PORTAL ILLUSION

Student Claims "Python 90%"

AI-Generated PDF Resume

AI

78% RESUME INFLATION

Unverified Claims & Ghost Skills

Over 78% of student engineering resumes contain exaggerated skills. Writing "Expert in React & SQL" costs nothing, forcing recruiters into endless rounds of elementary verification.

Zero verification at the point of submission.

64% DEGREE DETACHMENT

Grades Don't Reflect Tool Competence

A university transcript awards an "A" in Database Systems, but cannot verify if the candidate can handle messy production data parsing, LAG window functions, or write defensive queries.

Curriculum gap remains hidden from professors.
