

ProofBridge: The Cryptographic

An evidence-based talent intelligence network that replaces unverified resumes with mathematical proof anchored by accredited universities.

PILLAR 01

Skill Twin

Continuous digital twin of verified student competence derived from real code repositories, not self-reported CV text.

- Frozen Git Revisions (SHA-256)

PILLAR 02

Role Genome

Job requisitions converted into multi-factor capability vectors with exact rubric levels (L1-L4) and percentage weights.

- Zero keyword ambiguity

PILLAR 03

Bridge Metrics

Algorithmic pathfinding for career development (missions to bridge match).

- Shortest-path employment

OPERATIONAL WORKFLOW

How ProofBridge Operates in Real Time

1 CHALLENGE SANDBOX

Candidate Solves Challenge

Student writes SQL/code against uncurated enterprise anomalies. Validates results in interactive test runner.

2 ATOMIC CODE FREEZE

Revision Lock & Audit

PostgreSQL creates an immutable frozen revision with SHA-256 hash. Student writes contribution defense & AI disclosure.

3 FACULTY APPROVAL

Standardized Review

Accredited faculty review (L1-L4). Issues institutional feedback.
